

Print Mail™

*Now for use with the HP 4200/4250/4300/4350 with JetLink Technology ...
A4 or letter compatible*

Now there's a way to eliminate those laborious folding, stuffing and sealing chores. The Print to Mail™ accessory automates office mailings like payroll checks, accounts payable checks, statements, invoices, grade reports, student schedules and tax forms. The Print to Mail™ accessory attaches to the HP Laser Jet 4200/4250/4300/4350 series printers, folding and sealing the printed document in one easy step, at a rate of up to 45 pages per minute (printer dependent).

With the lowest cost in the industry, the Print to Mail™ is affordable to any size business or organization.

Reduce Costs

Print to Mail™ forms replace both the envelope and the paper used with conventional mail and can reduce your mail preparation costs up to 50%. (*Results may vary based on the number of mailers and process used to produce them.*) Print to Mail™ forms are available in a number of different formats to cover a wide variety of office mailings and totally eliminate the time consuming, manual steps of folding, stuffing and applying postage.

Versatile Design

In addition to the traditional folding and sealing application, the Print to Mail™ accessory can be used as a folder for promotional materials or other office correspondence requiring a standard or windowed envelope.

Easily Customizable

We can help you format your forms and create a customized Print to Mail™ system for your own application(s).

Designed with quality and reliability, now you can turn your HP Laser Jet printer into a complete mailing solution - easily and affordably. Your private information stays private and your mailings always look neat and professional.

Jet Link

Developed by HP to control the flow of paper between the HP 4200/4250/4300/4350 printers and the Print to Mail™, Jet Link allows for the only true one step, hands-free fold and seal solution. If a jam occurs anywhere in the printing, folding or sealing process Jet Link will pause both the printer and the Print to Mail™ until the cause of the jam has been corrected. Once cleared, the printer will automatically reprint the miss-fed forms so the user would not have to re-start the print job.

Benefits

- Reduce Operating Costs up to 50%
- Cuts time by 65% -- No folding, stuffing, labeling and sealing chores
- Fold and seal Print to Mail™ forms
- No more problematic self-mailers
- Up to 45 pages per minute printed, folded and sealed
- Eliminate the cost and inventory of envelopes
- Streamline your entire mailing process
- Engages and disengages easily in seconds
- Improve receivables
- Professional results

Pressure Seal Forms

PTM Document Systems guarantees that the forms we produce for use with the Print to Mail™ hardware will fold and seal perfectly. We can increase the efficiency of your Print to Mail™ hardware by applying years of production experience to the manufacturing of your form. Incorrectly manufactured forms can cause equipment failure and poorly sealed documents.

We stock a wide variety of checks and forms as well as produce custom forms to meet your particular needs. PTM Document Systems offers the highest quality form with a 100% guarantee of Print to Mail™ compatibility.
